# FEDERATION OPEN DAY

Online meeting via Microsoft Teams

14:30 – 15:40 (CEST)

The H2020 INCLUDING project organizes the Federation Open Day. The main objective is to exchange of expertise, knowledge and resources with other EU completed and on-going projects and existing clusters and to expand the cooperation with other national and international practitioner associations and projects.

This project has received funding from the European Union's Horizon 2020 research and innovation under grant agreement No. 833573

Rachele Brancaleoni  
(Chairperson)

# REGISTRATION TO Federation Open Day

The Meeting is open to practitioners, innovators, suppliers and academia with an interest in the sector. In particular, it is welcomed the participation of members of ongoing EU projects within the areas of interest.

Please, register at [link](#)

The Meeting will be held via Microsoft Teams. You can access the meeting using the link provided after registration.

Personal data will be processed according to Regulation (EU) 2016/679. More info and updates on the Federation Open Day at: [www.including-cluster.eu](http://www.including-cluster.eu)

**21 SEPTEMBER 2020**  
**2:30 PM**

Online Registration

# PROJECT

The H2020 INCLUDING project is to bring together infrastructure, equipment and experts coming from Medical Organizations, Fire Corps, Government Department, Municipalities, Law Enforcement Agencies, Ministries, Governmental and Civilian Research Institutes and Industries operating in the field of radiological and nuclear (RN) emergencies from across the EU. The INCLUDING (Innovative Cluster for Radiological and Nuclear Emergencies) project pursues to develop a Federation in which individual Members will cooperate to provide a common framework to standardize access to their respective facilities, enhance interoperability and to allow a more intensive use of expensive equipment.

## INCLUDING: INNOVATIVE CLUSTER FOR RADIOLOGICAL AND NUCLEAR EMERGENCIES

Horizon 2020, Topic SU-GM01-2018-2019-2020: Pan-European clusters of practitioners and other actors in the field of Security - Innovation clusters from around Europe managing demonstration sites, testing workbenches, and training facilities.
